

Revitalise winter rooms with an Ecomist fragrance!

Now winter rooms that are shut up all day can welcome you home with a fragrance that's fresh and clean or warm and relaxing.

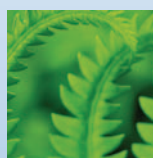

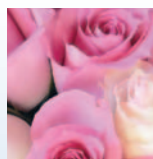

Ecomist has over a 100 different fragrances to choose from. Simply choose the fragrance that suits the special ambiance you want to create and use that aerosol in your Ecomist dispenser.

Some hints on choosing the right fragrance

Both Ecomist fragrances and our Aromachology Mood Maker Collection can be used to stimulate a wide range of sensory experiences, from invigorating to comforting. And with our huge selection of fragrances (we've just added 55 new ones to the range) there's plenty of scope to experiment, maybe use a different fragrance for weekends?

For a full range of fragrances available, visit our website www.ecomistsystems.com or choose a couple from our list of customer favourites below.

Marshall	Citrus, floral and woody
Verberry	Green citrus, orchard and ambur musk
Riverstone	Green & citrus, violet and marine
Far Out	Floral, violet and heavy woody
Green	Fern, green tea and woody
Royal Sport	Green, spicy, musky

Ecomist Insect Killer with natural Pyrethrins

Ecomist Insect Killer is a broad spectrum insecticide. This basically means it'll kill more than just flies, it's also effective against ants, mosquitoes, sandflies, spiders, fleas, moths, silver fish, cockroaches, wasps and other insects.

It's a repellent for insects at very low concentrations, which is good for the environment, and is harmless for warm-blooded mammals such as humans, dogs and cats. It's just the insects that don't find it pleasing!

COMING SOON

ECOMIST LINEN SPRAY

Refresh fabrics and furnishings with Ecomist Linen Spray.

Our brand new range of fabric fragrances will be available soon. These sprays draw on the same expertise that's made our room fragrances such a success. From rich and exotic aromas to sea breeze freshness, there's a fragrance here to refresh the wardrobes, curtains, bed linen and fabrics in every household. Lookout for Ecomist Linen Spray in Verberry, Aoud, Soliel, Pace and Velour fragrances.

Fragrancing for business

International studies have proven that the use of in-store fragrances can lead to -

- Longer browse times
- Happier staff
- Increased impulse purchasing
- Improved customer perceptions.

Many retailers from the hospitality & refreshment industry through to fashion and homewares are already using fragrances to increase their profits. Talk to Ecomist about the role that fragrances can play in helping your business, and ask your local franchisee about a free trial for commercial customers.

How many bugs will be sharing your cozy winter home?

You may not see as many flies around but armies of crawling insects are getting ready to leave the garden and move into your home! Bugs hate wet and miserable winters as much as you do so it's no surprise that when it's cold outside and food is scarce your kitchen in particular becomes a magnet for ants, cockroaches and a multitude of other creepy crawlies. Make sure Ecomist insect control is still working for you right through winter.

Use your dispenser to control household odours

Your Ecomist dispenser is also the effective and easy way to neutralise odours rather than just cover them up. The same dispenser that kills insects can also eliminate cooking, mould, toilet, body, tobacco and paint smells. Plus there's even a special formula to combat non-organic odours such as formaldehyde, ammonia and sulphur. Odour Neutraliser cans are available with over 100 fragrances, so call Ecomist to order yours today.

Did you know?

An ant brain has about 250,000 brain cells. A human brain has 10,000 million so a colony of 40,000 ants has collectively the same size brain as a human!
